

## Proactive Threat Detection and Vendor Monitoring: A MAMAA Success Story

### Introduction

In the rapidly evolving world of cybersecurity, HackNotice stands out for its cutting-edge, tailored monitoring and alert services. With real-time, actionable threat intel, HackNotice has redefined how businesses approach digital security. Moreover, our commitment to customizing our services to each client's unique needs sets us apart in a crowded field.

### The Challenge

A prominent MAMAA company, with its vast digital assets and global footprint, faced significant challenges in rapidly monitoring threats and managing third-party vendor risks. In an environment where digital threats are increasingly sophisticated, and where time is of the essence, the company sought a partner capable of providing advanced, instant threat intelligence and independent vendor monitoring – functions that other and tech stacks had proven unable to provide. Threat intel companies and tech stacks had proven unable to provide.

### Customer Quote

*“We’ve been really happy with the service. Last month alone you provided us with 12 actionable alerts.”* This acknowledgment underscores the effectiveness and impact of our tailored approach.

### Solution

HackNotice's real-time, detailed monitoring service, tailored to the company's specific security environment, provided powerful solutions:

#### Immediate, API-Configured Threat Detection:

We provided the MAMAA company with targeted alerts specific to their digital landscape, sent instantly, plus a robust API to automate ingestion into their internal systems, effectively creating a real-time pager system of vendor security incidents.

#### Superior, Scaled Vendor Monitoring:

Uniquely, our service offered independent third-party vendor monitoring, enabling the company to maintain a vigilant eye on thousands of vendors across a dauntingly complex, vast supply chain, and freeing the company from reliance on vendor disclosures. The economic, flexible addition and removal of vendors added further benefit.

### Results

The benefits reaped by the MAMAA company were multifold:

## Proactive Threat Detection and Vendor Monitoring: A MAMAA Success Story

### Results

#### 01. Enhanced Security Posture

The 12 actionable alerts provided by HackNotice (in a single month) exemplify the proactive stance we enabled the company to take against potential digital threats. Moreover, detection and response times were dramatically shortened via HackNotice's real-time alerts.

#### 02. Independent Oversight

Our third-party vendor monitoring allowed the company to strengthen its defenses without relying on vendor disclosures, empowering them to take quicker and more effective remedial actions.

#### 03. Customized, Immediate Intelligence

Each alert delivered was tailored, sent in real-time, and relevant, significantly reducing the time to remediation and enhancing overall security resilience.

### Conclusion

Our partnership with the MAMAA company demonstrates HackNotice's commitment to transforming cybersecurity postures via powerful intel, delivered immediately. By providing customized, real-time intelligence and independent vendor monitoring, we dramatically boost clients' security, regardless of their size or industry. This case study is a testament to our ability to adapt, innovate, and lead in the cybersecurity space, setting new benchmarks for excellence.

### About HackNotice

HackNotice empowers risk management and threat intelligence teams by providing in-depth, real-time alerts and data related to the entire threat landscape – including 3rd, 4th, 5th, and nth-tier vendor breaches. HackNotice clients are instantly notified of any vendor-based data incidents, and get the in-depth data they need to keep themselves secure. With HackNotice, you'll anticipate and disrupt vendor-based breach chains like never before.
