

HackNotice for Education

Best-in-Class Breach and Leak Intelligence

Optimal Security Via Threat Awareness

HackNotice's Threat Awareness platform leverages market-leading breach and leak data to proactively alert organizations about compromised information shared on the dark web.

Why HackNotice?

Manage human risk with personalized security awareness

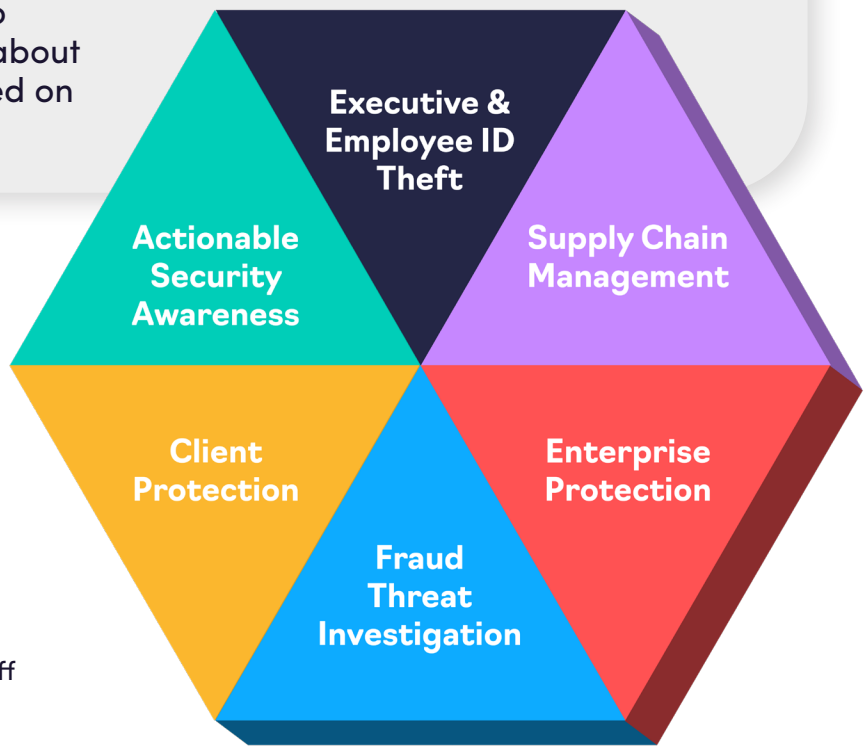

Protect both work and personal identities of staff by providing tailored, actionable training, directly related to genuine threats to their PII, for each individual staff member or student, which also maps to compliance requirements.

Continuously monitor vendor risk

Harness our real-time pager system for disclosed and undisclosed breaches & ransomware attacks against your supply chain and information partners, or the general education industry and related institutions.

Prevent account takeover and reduce response time

Protect staff and students with real-time

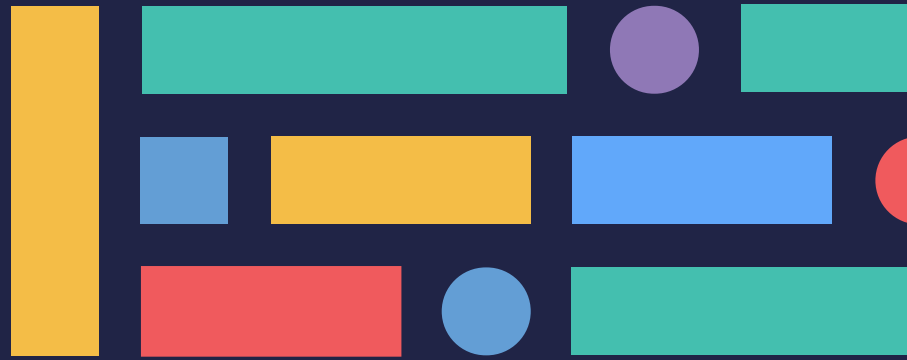

alerts to credentials and PII being shared by hackers, arming users and security teams with knowledge of data that may be used in spear phishing attacks & ATO.

Enhance risk assessments & staff digital exposure analysis

Dive into fraud and digital exposure risk with access to 40B+ leaked records actively sourced in real-time, directly from the global hacking community.
