

HackNotice for Government

Best-in-Class Breach and Leak Intelligence

Optimal Security Via Threat Awareness

HackNotice's Threat Awareness platform leverages market-leading breach and leak data to proactively alert organizations about compromised information shared on the dark web.

Why HackNotice?

Prevent account takeover and reduce response time

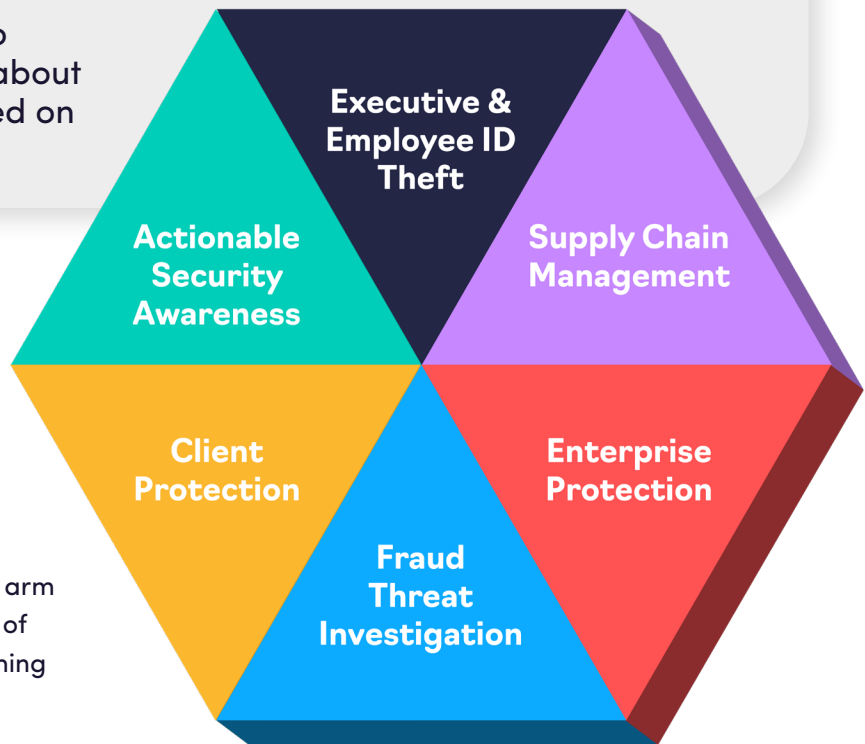

Protect staff with real-time alerts about credentials being shared by hackers, and arm users and security teams with knowledge of the data that could be used in spear phishing attacks & ATO.

Enhance risk assessments & fraud investigations

Dive into fraud and digital exposure risk with access to 40B+ leaked records actively sourced in real-time from the global hacking community.

Continuously monitor vendor risk

Harness our real-time pager system for disclosed and undisclosed ransomware attacks against your supply chain and information partners.

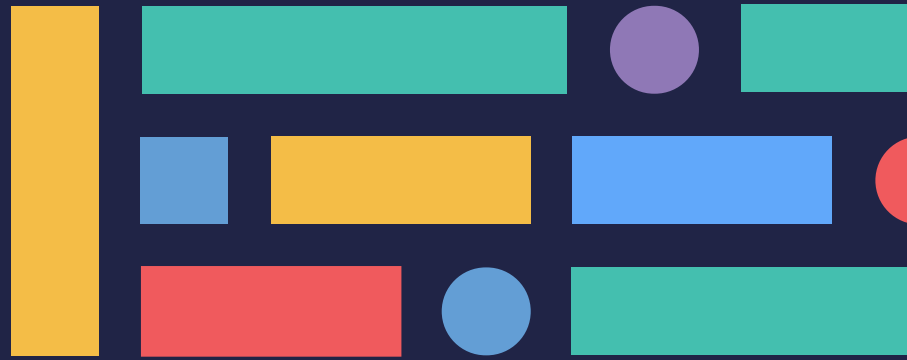

Protect customers from ATO

Monitor customer accounts and be alerted to exposed passwords, without privacy violations.

Manage human risk with personalized security awareness

Protect the PII of staff by providing tailored, actionable training, related to genuine threats to them, which maps to compliance requirements.
