

HackNotice for Healthcare

Best-in-Class Breach and Leak Intelligence

Optimal Security Via Threat Awareness

HackNotice's Threat Awareness solution leverages advanced threat intelligence to automatically notify organizations of emerging threats affecting their company, customers, and partners.

Securing The Healthcare Industry

Prevent HIPAA violations by securing patients' accounts

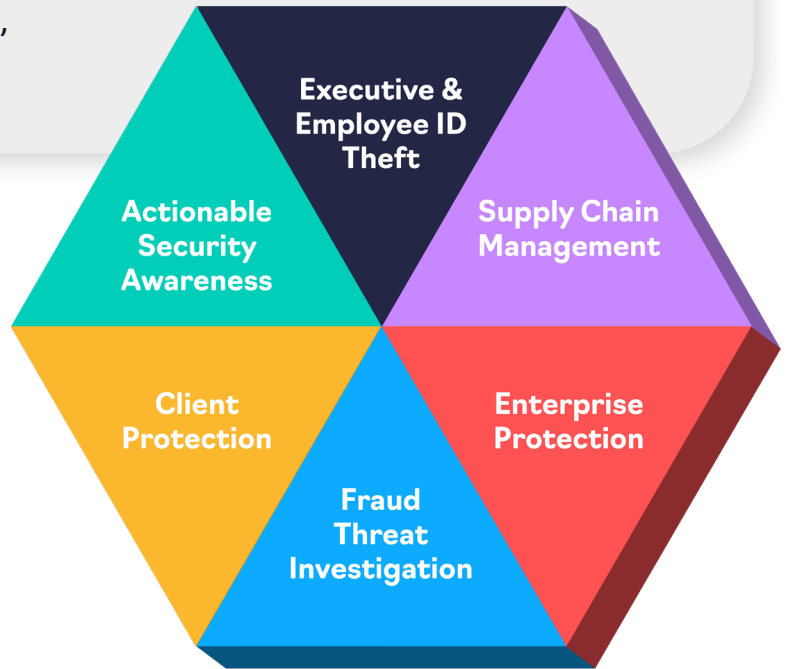

Monitor patients' accounts (i.e. MyChart) for hacker fraud, without patient privacy concerns: cleartext usernames, emails, or passwords are not required.

Ransomware trend alerts

Hackers act with a plan. Be on alert by understanding when ransomware gangs are targeting healthcare or related facilities, or any of your vendors or information partners.

Continuous supply-chain monitoring

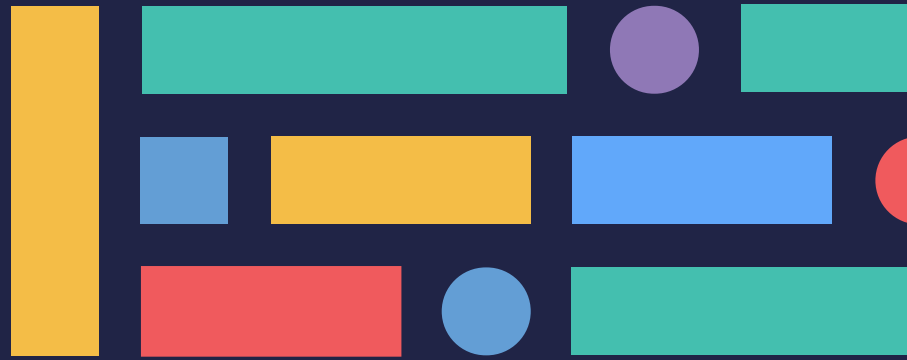

Real-time pager system for disclosed and undisclosed breaches and ransomware attacks against your supply chain and information partners.

Simple, relevant, and mobile security awareness compliance

Personal and corporate protection with tailored, actionable training that meets security awareness compliance requirements. Also available on our mobile app for caretakers on the move!
