

# HackNotice for Manufacturing

## Best-in-Class Breach and Leak Intelligence

### Optimal Security Via Threat Awareness

HackNotice's Threat Awareness platform leverages market-leading breach and leak data to proactively alert organizations about compromised information shared on the dark web.

### Why HackNotice?

#### Continuously monitor vendor compromises (GRC)

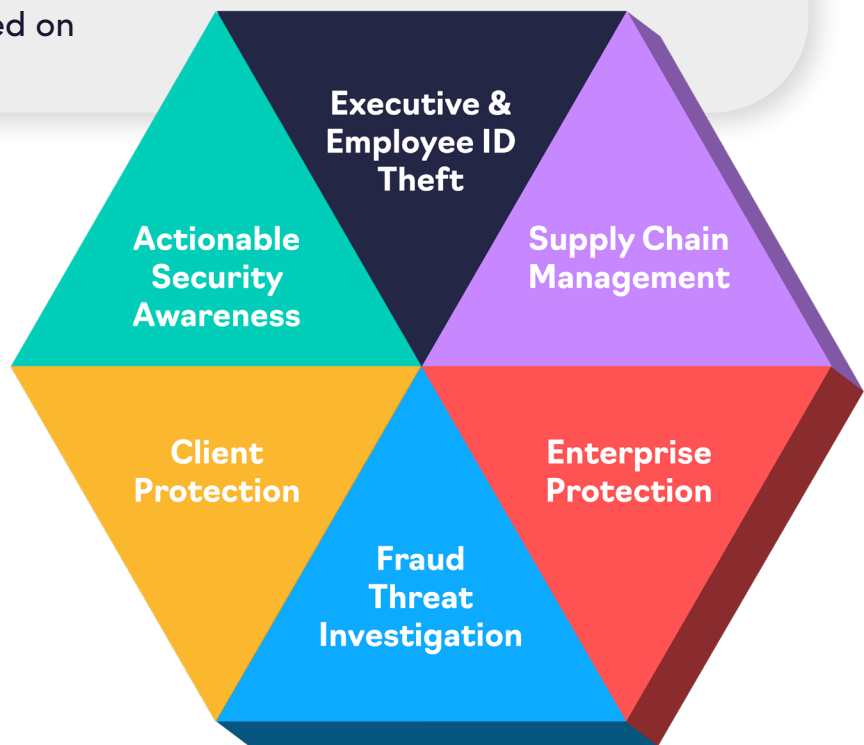

Harness our real-time pager system for disclosed and undisclosed breaches & ransomware attacks against your supply chain and information partners. Rapidly alert your procurement team if a vendor is compromised - preventing fraudulent invoices.

#### Prevent account takeovers and accelerate response time

Protect all system-access employees, and your domain, with real-time alerts to credentials and PII being shared by hackers, arming users and security teams with the data that will be used in spear-phishing attacks & ATO.

#### Penetration testing & red teaming

Dive into digital exposure risk with access to

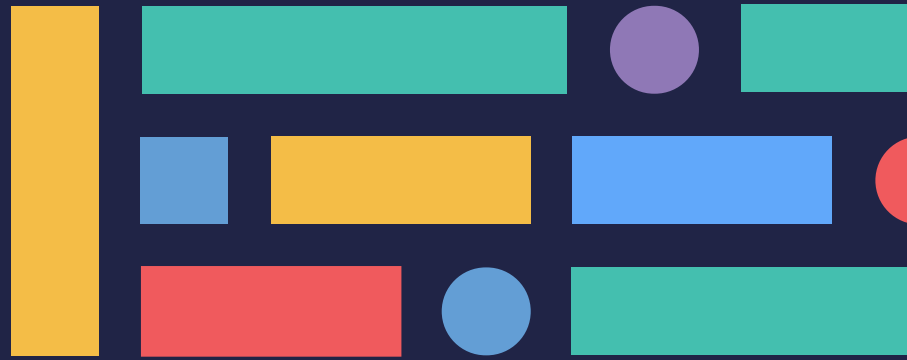

40B+ leaked records, actively sourced in real-time from the global hacking community.

#### Personalized security awareness on the go

Protect both work and personal identities of employees by providing tailored, actionable training for each individual employee, which maps to compliance requirements. Includes the HackNotice Mobile App, too!
