

Product Overview

Best-in-Class Breach and Leak Intelligence

Optimal Security Via Threat Awareness

HackNotice's Threat Awareness platform leverages advanced threat intelligence to automatically notify organizations of emerging threats affecting their company, customers, and partners.

Real-Time Intel: Why Do I Need It?

Prevent enterprise ATO & phishing

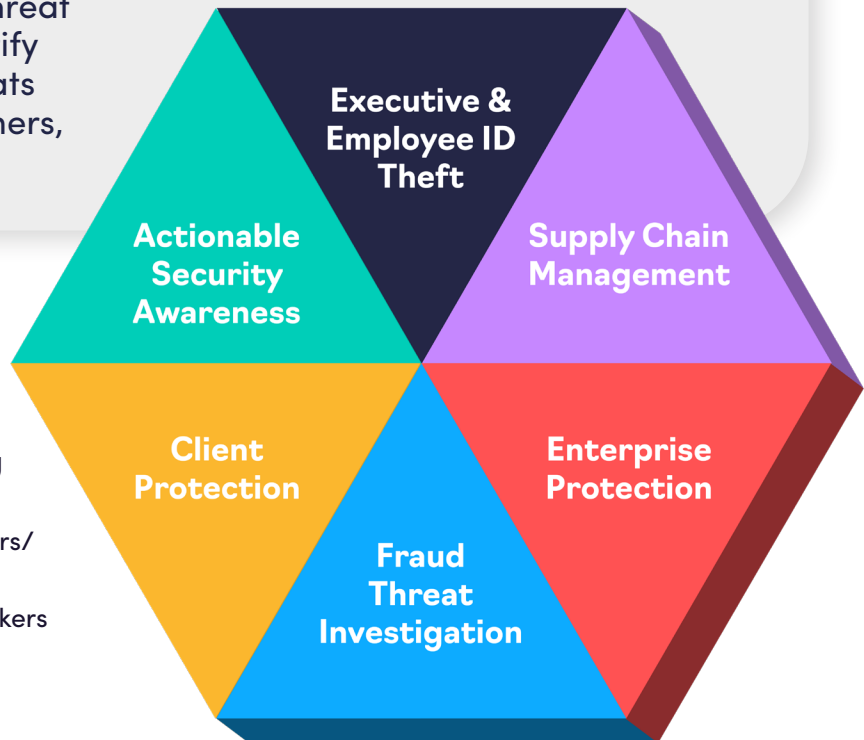

Receive alerts to credentials and identifiers/PII that hackers are actively sharing. Arm users and the SOC with the data that hackers could use maliciously in spear-phishing attacks and ATO.

Continuous supply-chain risk management

Real-time pager system for disclosed and undisclosed breaches & ransomware attacks against your supply chain and information partners.

Advanced persistent-threat & fraud investigations

Dive into fraud, digital exposure, and M&A risk with access to 40B+ leaked records actively sourced in real-time, directly from global and domestic hackers.

Client ATO & phishing protection

Monitor client accounts outside of your domain, without privacy concerns.

Human risk management, personalized security awareness, and ID Theft Protection

Personal and corporate PII protection via tailored, actionable training for each individual employee, directly related to genuine threats, which maps to compliance requirements.
