### Hold Vendors Accountable

#### Don't Rely on Vendor Disclosures

Hold vendors accountable by enforcing stringent security standards. Monitor and assess vendor activities in real time, ensuring compliance and better defenses against third-party risks.

### Solve Lateral Breach Movement

#### Halt Breaches from Spreading

Swiftly identify, isolate, and neutralize threats. Prevent attackers from moving laterally across systems and accessing sensitive data. Minimize damage and protect sensitive data by preventing unauthorized access across systems.

### Continuous Customized Monitoring

#### Every Event, in Real Time

Experience round-the-clock, tailored monitoring of your vendors to continuously assess their security posture. Build custom watchlists and stay informed of any changes or risks.

### Start Immediate Investigations

#### Make Vendor Investigations a Breeze

Start immediate investigations into vendor activities to quickly uncover and address potential security risks. Launch rapid response and mitigation and safeguard your supply chain against threats.

### Uncover Fourth-Party Risks

#### Stop the Domino Effect

Extend risk monitoring beyond direct partners to include the vendors of your vendors, revealing hidden vulnerabilities within the extended supply chain. Proactively identify and mitigate risks posed by fourth-party entities, ensuring comprehensive protection and maintaining the integrity of their business operations.

### Predictive Breach Insights

#### Find Early Risk Indicators

Gain foresight into potential breaches with anomalies or spikes in trafficked data for any domain. Anticipate and thwart cyber threats before they materialize. Stay ahead of risks with proactive threat intelligence.
